PROFESSIONAL PROFILE

Physician with 10 years of clinical experience across primary care, occupational health and emergency medicine. Combines clinical reasoning, evidence appraisal and rigorous medical documentation to assess health information for factual accuracy, clarity and patient-safety risk. Current independent work focuses on a structured evaluation protocol for AI-generated medical content, including clinically significant omissions and unsupported claims. Native Brazilian Portuguese speaker with professional working proficiency in English.

POSTGRADUATE EDUCATION

Postgraduate Certificate - Artificial Intelligence and Data Science in Healthcare

Instituto de Ensino e Pesquisa do Hospital Sírio-Libanês, Brazil | May 2026 - Expected Jun 2027 | In progress

HEALTHCARE AI EVALUATION PROJECT

Independent Project - Healthcare AI Evaluation & Safety

2026 - Present

- Developing a structured protocol to evaluate AI-generated medical content against a predefined reference standard.
- Defined separate units of analysis and criteria for factual errors, clinically significant omissions, unsupported additions and patient-safety risk.
- Specified a source-blinded audit workflow with reproducible evaluation criteria and documentation.

CORE EXPERTISE

- | | |
|--------------------------------------|--|
